

Manifesto (English)

Axis of Survival Oswald Spengler once wrote on the book "Decline of the West" : If there ever was a Western civilization it was destroyed in two World Wars by the Western Powers, England and USA directed by Jewish background forces. There is no more a civilization of Western values. WWII was not only directed against European values but it was also meant to subvert all basic values of East and West. Therefore it was also a way of destruction against Japan as fortress of basic Eastern values. Representatives of Japan and Germany have joined in the same conviction: that if the world is meant to survive, a totally new path must be shown. These are the facts:

- Britain, USA and Israel are the forces against the rest of the world, determined to dominate and exploit all nations.
- In Nuremberg and Tokyo- they have demonstrated by manipulated mock-trials that they are not satisfied by mere military victory but are determined to declare any man or nation as evil and criminal who are standing in their way of world power. They have brutally killed and demonized the elected leaders of Germany and Japan. They have killed millions after the war and hanged the heroes of vanquished nations. There can be no "New World Order" under their dominance, like United Nations, NATO or any other international organizations, where they are giving the rules. This is not acceptable for other nations. Because they are committing up to this day all the crimes they are accusing others of.

We solemnly declare:

- There should be no world order under the leadership of One. There is no common culture for all the nations.
- Profit can never be the basis of culture.
- Belief in technical progress as the essence of life will destroy all culture and human dignity. It turns humans into soulless machines.
- Every nation has their own roots, cultural and religious heritage and should maintain and preserve them. Every nation has a different tradition and spiritual roots. Every nation should have her own system of government.
- Every nation needs an elite of leadership, - but not necessarily political parties.
- Not the so-called progress, but historical roots, basic values and hence heritage is needed for mankind. Japan and Germany were comrades in arms, and suffered the same fate and destruction. We feel a common commitment to show a better way for the future:

- No domination by Britain, USA or Israel
- Join us to build a world of truly independent nations.
- Stop devastating nature for profit
- Stop global financial multination cooperate power to take over. We need cooperation instead of domination and exploitation. Help us to prevent global suicide. And strengthen our axis for survival, before it is too late.
